S U M M A R Y

As a web developer since 2015, I'm a natural self-starter. Initially starting out with the PHP server-side programming language before embracing more contemporary technologies, I am constantly expanding my knowledge of programming as well as the industry that encompasses it.

S K I L L S

Front-end		Back-end	Database	Productivity
JavaScript	TypeScript	PHP	MySQL	Git/GitHub
ReactJs	Redux	NodeJs	MongoDB	UI/UX Design
HTML5	GraphQL		PostgreSQL	
CSS3				

P R O J E C T S

2021   React Comments • https://react-comments.netlify.app

Social media commenting platform
- Implemented and Designed a back-end server hosting an API with NodeJs
- Utilized Reacts' component based architecture to build a preformat Front-end website
- Hosted a remote MongoDB instance in the cloud using MongoDB Atlas to store application data
- React Context to store and manage application state for multiple components

2021   Pokésearch • https://pocketmonsters-search.netlify.app

Pokémon discover app
- Consumed a 3rd party API (PokéAPI) to power the application backend and ease development
- Designed a fast and mobile responsive frontend application with ReactJs
- Used ReactJs to capture user inputs and filter content to return relevant data to the user
- Utilized React Query to simplify data fetching logic

2021   HackManDo • https://hackmando.netlify.app

My personal portfolio
- Mobile responsive frontend application with ReactJs
- Central data source to ease the addition of future projects
