TypeScript	GraphQL	Django	NoSQL	Unit Testing	
		Flask			

PROJECTS

2021 **React Comments**   react-comments.netlify.app

Social media commenting platform
- Utilized the component based architecture of React to build a performant front-end application
- React Context to store and manage application state for multiple components
- Implemented and Designed a back-end server hosting a custom made API with NodeJs
- Hosted a remote MongoDB instance in the cloud using MongoDB Atlas to store application data

2021 **Pokésearch**   pocketmonsters-search.netlify.app

Pokémon discover app
- Consumed a 3rd party API (PokéAPI) and formatted the data to meet application requirements
- Mobile responsive, Minimalistic design, Important information easily viewable at a glance
- Implemented client-side search with React to capture user input and return relevant data
- Utilized React Query to simplify data fetching logic

2021 **HackManDo**   hackmando.netlify.app

My personal portfolio
- Mobile responsive, Full page carousel design
- Physics based animations with open source React library react-spring
- Dynamic routing that maintains selected page state on browser refresh
- Implemented animated carousel component to display and select personal projects

EDUCATION

Forsyth Central High School
2016 • High School Diploma
